Installing the Camera

ATTENTION - Test the camera prior to selecting a permanent mounting location by temporarily connecting the camera(s) and cables to the DVR.

1. Set the camera in the desired mounting position and mark holes for the screws.

2. Drill the holes for the mounting screws.
3. **OPTIONAL:** Insert drywall anchors as needed.
4. Connect the video and power cables as shown in the next section 'Setting up the Camera'.
5. Mount the camera stand to the desired surface using the provided screws.
6. Place the sunshade on top of the camera with the large end pointing in the same direction as the lens. Insert the sunshade screw.

7. Set the position and angle of the camera using the provided Hex Allen Key.

1. Twist the ring to tighten/loosen the stand connection and adjust the camera's horizontal position.

2. Loosen the screw near the stand and adjust the camera's vertical position.

3. If needed, loosen the screw near the camera and twist the camera head on the mounting stand.

WARNING - A REGULATED UL / CSA APPROVED 12V DC power supply is REQUIRED for use with this camera. Use of a non-regulated, non-conforming power supply can damage this product and voids the warranty.

Setting up the Camera

1. Connect the BNC connector of the camera to the video cable.
2. DC Power—**Power Adapter:** Connect a 12V DC Power Adapter (not included) to the camera. Plug the Power Adapter into a local power outlet.
 - DC Power—**Power Pigtail** (not included): Connect a Power Pigtail to the camera. Connect the terminating wires of the cable directly to the DC power source.

NOTE: For pigtail connection with 12V DC, make sure to check polarity specifications on the power adapter.

ATTENTION - This camera includes an Auto Mechanical IR Cut Filter. When the camera changes between Day/Night viewing modes, an audible clicking noise may be heard from the camera. This clicking is normal, and indicates that the camera filter is working.

3. Use the short arm of the provided Flat-head Allen Key to adjust the ZOOM and FOCUS control screws as required.

4. Insert rubber weatherproofing plugs (2x) firmly into the ZOOM and FOCUS screw-holes to ensure a weatherproof seal.
