SECO-LARM Introduces New SK-910RA Series Miniature RF Receivers

IRVINE, CALIF., July 18, 2007 - SECO-LARM is now shipping its new SK-910RA Series of Miniature Low-Voltage RF Receivers as new additions to its extensive line of RF products.

SECO-LARM's Miniature Low-Voltage RF Receivers offer a small size (3-3/16" x 2-9/16" x 3/4") and also low voltage requirements - 11-24VAC/VDC for the SK-910RA and 3-13.8VDC for the SK-910RAV and SK-910RAV2.

All the units have LEDs to show RF reception and program status. They also have Mode switches for easy transmitter learning. The SK-910RA has a standard Form C (Common / N.C. / N.O.) 1A relay output. The SK-910RAV has a single 5A transistor ground output, and the SK-910RAV2 has dual 3A transistor ground outputs. The outputs are programmable for 4-sec. momentary (default), 1-sec. momentary, toggle (ON/OFF), or continuous.

The receivers are compatible with all of SECO-LARM's 315MHz transmitters.

A wide range of RF products are also available from SECO-LARM, including transmitters and receivers in 1, 2 and 4 channel configurations.
