## **SECO-LARM RF TRANSMITTERS WITH WIRED CONNECTORS** **MAKE ANY APPLICATION A WIRELESS APPLICATION**

**Just connect the miniature transmitter to a hard-wired sensor or switch,  
and it instantly becomes part of a wireless security or access control system.**

IRVINE, CALIF., October 13, 2003 - SECO-LARM U.S.A, Inc. has introduced a single-button, RF remote control transmitter with wired connectors for use in adding wireless convenience to many applications which currently require the running of wires or armored cables.

The company's new SK-919TDWS-BU can be used for a variety of security and convenience applications. For instance, the SK-919TDWS-BU can be connected to a push-button switch to remotely activate a locking device without the need to run a cable between the switch and the locking device. The SK-919TDWS-BU can also be connected to a motion sensor or other type of detecting device to remotely trigger a strobe light or interior light. For a wireless doorbell, connect the SK-919TDWS-BU to a switch so that it can remotely trigger a siren. The above are just a few examples of how this product can be used.

Note that these applications require the use of an optional RF receiver.

The SK-919TDWS-BU can be powered by the included 12VDC alkaline battery, or it can be connected to a 12VDC battery or an AC adapter. It can trigger devices at up to 500 feet away using one of over 68 billion possible codes. The SK-919TDWS-BU is compatible with all SECO-LARM receivers including the single-channel SK-910R, the dual-channel SK-910R2, and the newly-introduced four-channel SK-910R4.

The new SK-919TDWS-BU RF transmitters with wired connectors and the RF receivers are currently shipping to authorized SECO-LARM distributors and dealers.

This new RF transmitter is just one of SECO-LARM's wide selection of equipment and accessories for the security and electronics industries. For more information on the SK-919TDWS-BU, or on SECO-LARM's complete line of vehicle security and convenience, commercial and residential security, CCTV and access control products, or to request our latest catalog, please contact:
