

Power Supply/Battery Charger

MG1261.5A Auxiliary Power Supply/Charger

- Power supply & charger
- PC board configuration
- 6 or 12VDC selectable output
- Input: VAC 16.5 40VA (works with MGT-1640)
- Power supply channel (to power backup battery)
 - 12VDC mode: charging voltage: 13.6VDC
 - Charging current: 130 milliamp maximum
- Main power output load voltage: 13.6VDC
 - Current: 1.5 Amp max (without battery backup)
- Standby time: 24Hrs @ 200mA drain level (without battery backup)
- Back up battery: standard 4AH, sealed lead-acid type (not included)
 - LED's: green remains on as long as AC power is connected to the terminal strip
 - UL Listed
 - Package individually
